S5020 NEEDLE VALVE ASSEMBLY

ENYA ORIGINAL AND GENUINE PARTS

ENYA C/L ENGINE suitable for S5020 >>> SS40, SS45, SS50, 45CX, 50CX, 61CX, 60-III B

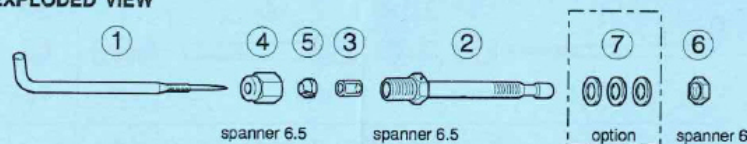

Directions for use

- Point that needs to be checked first
 - Loosen the spray bar holder ④. However it must not be removed from the spray bar ②.
 - Close the needle ① clockwise, and confirm whether the needle completely closes. (The needle closes about 18 times.)
- Installation to the engine
Insert the spray bar ② into the engine, and fix it by the lock nut ⑥.
- Adjustment of the needle
 - Close the spray bar holder ④, and confirm whether the needle ① completely fixes.
 - Regulate the hardness of the needle rotation with your liking, while you loosen the spray bar holder ④ gradually.
 - Start your engine, and adjust the needle valve to suitable position.

Attention for handling

- The needle ① closes about 18 times. Don't tighten further it by force.
- The needle ① may be hard to enter in the inner part because the buffer tube ③ is obstinate at first. It will fit in with the needle ①, while that closes and opens several times.
- When you remove the needle ① and spray bar holder ④ at the same time, the needle holder ⑤ easily falls out; therefore you must be careful not to lose it.

EXPLODED VIEW

① Needle / ② Spray bar / ③ Buffer tube / ④ Spray bar holder / ⑤ Needle holder
⑥ Lock nut / ⑦ Spacer washer set (optional parts)

Supplementary explanation

- Reference data of the needle valve for 50 ~ 61 class engine . . . 3 ~ 4 times.
- Replace with the new buffer tube ③ if the effect as rubber fades away by the passage of time.
- Use the spanner of flat diameter 6 and 6.5. There is the following tool of the release from us.
 - ETS 13 Spanner (5.5×6) ¥420
 - ETS 14 Spanner (6.5×7) ¥420
- If you use this product for a small engine (11CX, SS15 ~ SS35, 35X etc), please try the following part. The hole position of the spray bar can be moved to the axial center.
 - SPW4S Spacer washer set: (3 pcs) ¥105
